

## Dräger PAS® Filter series

### Filters for external air supply systems

PAS Filters reliably clean air, e.g. from an existing high-pressure network, from liquid and solid particles, including oil vapour and smell. This not only means that you get breathing air which even exceeds the specifications of DIN EN 12021. You also save yourself the need of a separate breathing air line.

#### WALL-MOUNTED OR PORTABLE

The PAS Filters can be mounted to the wall or placed on the floor. The connections of the wall-mounted versions are located at the bottom. This enables users of breathing apparatus to move in all directions without kinking the hoses.

The portable version with carrying handle and side connections has three legs which prevent it from becoming dirty. They also ensure a firm hold on uneven surfaces.

#### MANUALLY ADJUSTABLE AIR PRESSURE

The primary pressure from the line can be easily adjusted at the filter using a key. This means that you can connect compressed air breathing apparatus according to DIN EN 14594 for positive pressure and normal pressure masks. The set pressure is displayed on the manometer directly at the filter.

#### COMPATIBLE WITH ALL DRÄGER BREATHING AIR SYSTEMS (E.G.):

- Dräger PAS Lite
- Dräger PAS Colt
- Dräger PAS Micro
- Dräger PAS AirPack
- Dräger ABIL

#### FURTHER ADVANTAGES

- two connection options:  
for max. three (760 L/min) or max. five persons (1,080 L/min)
- included in the scope of supply:  
active carbon and particle filters for solid and liquid particles incl. humidity, oil droplets and smells
- optional: Pre-filter for heavy soiling
- robust, stable housing made of polyethylene

Dräger PAS® Filter - portable

Dräger PAS® Filter - wall-mounted
